OFFICIAL BONUS BALL RULES 2011

100: SEQUENCE AND RACKING

1. A **Bonus Ball Game Set** comes with nine 2 1/4" balls, plus a cue ball. The balls are colored, a **Black** ball (**Bonus Ball**), four **Purple** balls and four **Orange** balls. The game set also includes a computer DVD of our scoreboard and a **Johnny Archer** "How to play Bonus Ball". Go to www.playbonusball.com for information on how to order your game set.

2. **SEQUENCE of potting balls:** All balls must be pocketed in sequence. A **sequence** is **PURPLE, ORANGE, and then the BONUS BALL**. Remember, the **Bonus Ball** is re-spotted to the center of the table, each time it is pocketed .

(a) If you fail to pocket a Purple ball, you must continue shooting a Purple ball on your next visit.

(b) If you pocket a Purple ball and fail to pocket an Orange ball, you must continue your next visit on an Orange ball.

(c) After pocketing an Orange ball, you will then have ONE opportunity to pocket the Bonus Ball. Failure to pocket the Bonus Ball will end your visit and that sequence. Your next visit will start with a new sequence, which starts with the Purple ball.

3. **RACKING:** All balls are racked by the breaker. (Rack your own) The rack is set at the foot of the table with the **Bonus Ball**, in the center of the table. The head ball, a **Purple** ball, of the rack is placed at the foot spot. Behind the purple are two **Orange** balls then flanked by three **Purple** balls. These are followed by the last two **Orange** balls.
